

Dear Senator

I urge you to support NYS Bill S3668 – the Comprehensive Contraceptive Coverage Act – a crucial piece of legislation for health care of New Yorkers. The CCCA protects the existing contraceptive coverage mandate and breaks down the barriers to contraceptive access so that all New Yorkers with health insurance have contraceptive coverage that is comprehensive, consistent, and equitable.

Contraception is a routine part of basic health care and restricting affordable accessibility to contraception would make it inaccessible for countless New Yorkers. Marginalized New Yorkers would bear the biggest burden; it would affect lower-income New Yorkers, people of color, and young people the most.

If NYS Bill S3668 becomes law, it will guarantee New Yorkers affordable contraception methods best needed for their health. When quality contraception is not accessible, many people risk their health and safety. It is a disservice to New Yorkers to deny them the health care they need.

I hope that you will support NYS Bill S3668 and fight to ensure that all New Yorkers receive the healthcare they need.

Sincerely,
